EXECUTIVE SUMMARY

SURVEY BACKGROUND AND METHODS

The City of Westminster has conducted a regular, periodic survey of residents' opinions since 1992. The 2018 survey was the fourteenth administration to monitor the quality of Westminster services and quality of life in the community. Working with National Research Center, Inc. (NRC), Westminster has used the same systematic method for sampling residents and the same set of core questions for each survey administration.

A random sample of 3,000 households received surveys. About 4% of the surveys were undeliverable because the housing unit was vacant or the postal service was unable to deliver the survey as addressed. Of the 2,890 households receiving a survey, 616 completed the survey, providing an overall response rate of 21%. The margin of error for all survey respondents is plus or minus four points around any given percent. Results also are reported by school district of residence (Adams 12, Westminster and Jefferson County) to permit a deeper examination of the data.

Because the City of Westminster has administered resident surveys in the past, comparisons were made between the 2018 responses and those from prior years, when available. The 2018 results also were compared to those of other jurisdictions around the nation and in Colorado's Front Range, made possible through NRC's benchmark database. This database contains resident perspectives gathered in citizen surveys from more than 600 jurisdictions across the U.S., including cities and counties.

KEY FINDINGS

The 2018 survey contained a series of questions that reflected either directly or indirectly on the City's progress within several themes. The survey results are organized around the City of Westminster 2017 Strategic Plan goals and the key findings presented below outline the main highlights from the 2018 survey data across all the Strategic Plan goals.

While evaluations of most aspects of quality of life remained stable, residents' views improved regarding the quality of their neighborhoods.

- Ratings of overall quality of life were positive and stable over time. Almost 9 in 10 respondents gave favorable evaluations which was similar to both the national and Front Range benchmarks.
- The 2018 questionnaire included new questions about the reputation of the City and diversity. Threequarters of residents gave favorable assessments to the overall image or reputation of the City, a rating that was similar to both benchmark groups. About two-thirds gave positive reviews to the community's openness and acceptance of people of diverse backgrounds (similar to the benchmarks).
- A majority of residents positively rated the City as a place to live (90% very good or good) and retire (59%); these ratings were on par with prior survey years. However, assessments for both of these items were lower or much lower than the benchmarks.
- In 2018, 81% of respondents rated the overall quality of their neighborhoods as very good or good. This was an increase from 2016 (75%) and was a rating that was higher than the national average.
- The City as a place to raise children emerged as an area of opportunity related to quality of life and community. While about three-quarters of residents gave very good or good reviews to this aspect (similar to prior survey years), it was lower than both national and Front Range benchmarks. Additionally, the quality of public schools was evaluated lower than the national and Front Range averages, with about 6 in 10 respondents giving positive marks.

Growth-related challenges were among top concerns for residents.

• Residents evaluated 13 potential problems in the community. As in 2016, too much growth and the high cost of housing were the top two concerns for residents (58% and 68% of respondents rated these as major or moderate problems). The proportion of respondents in 2018 rating each of these as a major or moderate problem increased by 17% and 12%, respectively.

- However, when residents were given a list of 15 goals or services the City provides and rated the
 importance of each, ensuring the City provides ample affordable/workforce housing was rated among the
 bottom four. About two-thirds of respondents felt this was an essential or important service for the City to
 do.
- Growth in any community comes with growing pains, which commonly includes concerns about mobility. Snow removal and street repair received lower evaluations in 2018 compared to 2016. While both were rated similar to the Front Range benchmarks, snow removal was lower than the nation and street repair was rated similar. Additionally, these services were among those rated as lower in quality and higher in importance.
- Among 15 goals or services the City provides, ensuring streets are well-maintained and clear of snow was viewed as the third most important (94% gave essential or very important ratings).
- When evaluating whether they agreed that eight statements described their image of the City of Westminster, respondents were less likely to agree that "ease of mobility" described their image of the City.

Evaluations of government performance improved and most respondents felt the City is headed in the right direction.

- Residents evaluated three aspects of government performance. Sixty-eight percent of respondents agreed that the City government welcomes citizen involvement and 57% strongly or somewhat agreed that City Council cares what people like them think. These evaluations both increased from 2016 and where benchmark comparisons were available, ratings were similar.
- About two-thirds of residents agreed that they received good value for the City taxes they pay. This rating has remained stable since 2010 and was higher than both benchmark groups.
- Almost 9 in 10 respondents felt that the City is headed in the right direction. This rating was similar to previous years.
- The overall quality of services provided by the City has remained strong and stable over the last decade. Eight in 10 residents rated it as very good or good, a rating that was similar to the national and Front Range averages.
- Among the statements that could describe their image of Westminster, 88% of respondents agreed that "financially sustainable" fit their image of the City.

Life and safety services were of high importance and topped residents' list of priorities for the City.

- From the list of 15 broad service categories or potential goals for the City, those related to life and safety topped the list. Nearly all residents felt that providing safe drinking water and sewer services and providing for a safe community were essential or very important for the City to do.
- About 8 in 10 respondents reported feeling very or somewhat safe from residential fires and violent crimes in Westminster and about 6 in 10 felt safe from property crimes. While these evaluations were similar to prior survey years, where comparisons were available to the benchmarks, ratings mostly were lower than the nation and Front Range.
- Life and safety-related City services scored among the highest in terms of importance. At least 89% of residents felt fire and police protection, EMS, drinking water quality, sewer services, and emergency preparedness were essential or very important services. Quality evaluations of these services ranged from 71% very good or good (for emergency preparedness) to 91% (for fire protection). Generally these quality ratings were stable over time and most were similar to the benchmarks. However, ratings of police protection, fire protection, and EMS were rated lower than both benchmarks.
- About 8 in 10 residents said that "safe and secure" described their image of Westminster. This phrase received the third highest levels of agreement out of eight.

The City should continue to leverage its online presence to engage the community.

• Overall, residents seek out information about the City from three primary sources: the Parks, Recreation and Libraries Activity Guide, the City's Website, and City Edition.

- About one-quarter of residents rely on social media (Facebook, Twitter, Nextdoor, etc.) as a source most
 used for information about the City and the majority of residents (80%) had used Facebook in general in
 the last month. Additionally, one-third reported the City's Facebook and Nextdoor accounts were sources
 of information and less than one-quarter said the City's Twitter account or YouTube channel were
 information sources.
- While about one one-quarter of residents relied on the Activities Guide and website for their City information and about 8 in 10 considered each a major or minor source of information, the City's website was the preferred, most relied-upon source of the two. City Edition also was among the top, most relied-upon sources for City news.
- A significantly higher proportion of residents used Nextdoor in the month prior to the survey in 2018 than in 2016; use of Reddit and Snapchat also increased between survey years.

SURVEY BACKGROUND

SURVEY PURPOSES

The City of Westminster contracted with National Research Center, Inc. (NRC) to implement the 2018 survey with a representative sample of residents, in an effort to determine attitudes about City services and pending local policy. The first survey of residents was conducted in 1992, with subsequent implementations every two years since; the 2018 survey marks the fourteenth iteration of the survey providing over two decades of data.

The survey permitted residents an opportunity to provide feedback to government on the community's strengths, opportunities for improvement, and priorities for planning and resource allocation. The continued focus on quality of service delivery helps council, staff and the public set priorities for budget decisions, assuring maximum service quality over time as the City changes and grows.

SURVEY ADMINISTRATION

The Westminster Citizen Survey was administered by mail to a representative sample of 3,000 city residents. Each household received three mailings beginning in January 2018. The first mailing was a prenotification postcard announcing the upcoming survey. Over the following two weeks, households received a letter from the Mayor inviting the household to participate in the 2018 Westminster Resident Survey, a five-page questionnaire and pre-addressed, postage-paid envelope. Respondents also were given the option to complete the survey via the web through a link that was provided in the cover letters as well as to complete the survey in Spanish either online or via a requested paper copy (instructions were included in the letters). Completed surveys were collected through the mail and online over a five week period. The survey materials appear in *Appendix H: Survey Materials*.

About 4% of the mailings were undeliverable because the housing unit was vacant or the postal service was unable to deliver the survey as addressed. Of the 2,890 households receiving a survey, 616 completed the survey, providing an overall response rate of 21%.

Survey results were weighted so that respondents' gender, age, housing unit type (attached versus detached), tenure (rent versus own), race, ethnicity and school district of residence were represented in the proportions reflective of the entire city. (For more information see the detailed survey methodology in *Appendix G: Survey Methodology*.)

In addition to the scientific, random selection of households, a link to an online "opt-in" survey was publicized and posted to the City of Westminster website as well as the City's social media sites. This opt-in survey was identical to the scientific survey and open to all Westminster residents; 899 residents completed the opt-in survey. The data presented in this report exclude the opt-in survey data. These data can be found in the *Supplemental Online Survey Results* provided under separate cover.

HOW THE RESULTS ARE REPORTED

For the most part, frequency distributions (the percent of respondents giving each possible response to a particular question) and the "percent positive" are presented in the body of the report. The percent positive is the combination of the top two most positive response options (i.e., "very good" and "good," "strongly agree" and "somewhat agree," "very safe" and "somewhat safe," etc.).

On many of the questions in the survey, respondents could give an answer of "don't know." The proportion of respondents giving this reply is discussed in the body of this report if it is 30% or greater. However, these responses have been removed from the analyses presented in the body of the report, unless otherwise indicated. In other words, the majority of the figures in this report display the responses from respondents who had an opinion about a specific item. The full set of frequencies, including "don't know" responses, can be found in *Appendix A: Complete Set of Survey Responses*.

For some questions, respondents were permitted to select multiple responses. When the total exceeds 100% in a table for a multiple response question, it is because some respondents are counted in more than one category. When a figure for a question that only permitted a single response does not total to exactly 100%, it is due to the common practice of percentages being rounded to the nearest whole number.

PRECISION OF ESTIMATES

It is customary to describe the precision of estimates made from surveys by a "level of confidence" and accompanying "confidence interval" (or margin of error). The 95 percent confidence interval for this survey is generally no greater than plus or minus 4% around any given percent reported for all survey respondents (616).

COMPARING SURVEY RESULTS BY RESPONDENT SUBGROUPS

Select survey results were compared by demographic characteristics of survey respondents as well as the geographic location of respondent households. These comparisons are discussed throughout the body of the report, when applicable. The full set of results by demographic characteristics and geographic area can be found in *Appendix C: Comparisons of Select Questions by Respondent Characteristics* and *Appendix D: Comparisons of Select Questions by School District*. For comparisons among subgroups, the margin of error rises to approximately plus or minus 5% for subgroups of 400 to plus or minus 10% for subgroups of 100.

COMPARING SURVEY RESULTS OVER TIME

Because this survey was the 14th in a series of resident surveys, the 2018 results are presented along with past ratings when available. Differences between years can be considered "statistically significant" if they are six percentage points or more around any given percent. Trend data for the City of Westminster represent important comparisons and should be examined for improvements or declines. Deviations from stable trends over time especially represent opportunities for understanding how local policies, programs, or public information may have affected residents' opinions.

For ease of comparison, the results from past surveys are reported using the percent positive (e.g., "very good" and "good"). Data from all past survey years, except 1994, could be converted to this metric. As such, comparison data from all past years, except 1994, are included in this report. If interested, readers may refer to the Westminster archives for the 1994 average results.

COMPARING SURVEY RESULTS TO OTHER COMMUNITIES

NRC's database of comparative resident opinion is comprised of resident perspectives gathered in citizen surveys from more than 600 jurisdictions whose residents evaluated local government services. Conducted with typically no fewer than 400 residents in each jurisdiction, opinions are intended to represent over 30 million Americans.

National and Front Range benchmark comparisons have been included in the report when available. Benchmark comparisons have been provided when similar questions on the Westminster survey are included in NRC's database and there are at least five jurisdictions in which the question was asked, though most questions are compared to more than five other cities across the country or in the Front Range. Data for a number of items on the survey were not available in the benchmark database (e.g., some of the services or aspects of the community or quality of life). These items are excluded from the benchmark tables.

Where comparisons for quality ratings were available, Westminster's results were generally noted as being "higher" the benchmark, "lower" the benchmark, or "similar" to the benchmark. In instances where ratings are considerably higher or lower than the benchmark, these ratings have been further demarcated by the attribute of "much" (for example, "much lower" or "much higher"). Additional information on NRC's benchmarking database, including jurisdictions to which Westminster was compared nationally and in the Front Range can be found in *Appendix F: Benchmark Comparisons*.

SURVEY RESULTS

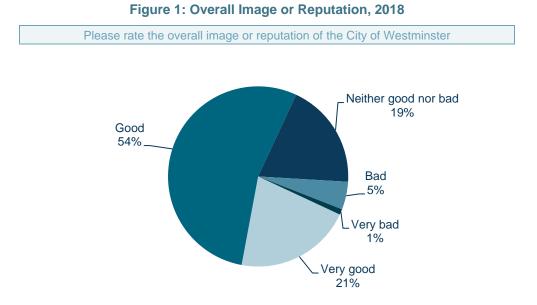

The 2018 Westminster survey contained a series of questions that reflected either directly or indirectly on the City's progress around the City of Westminster's 2017 Strategic Plan goals. This report is organized around these goals for ease of integration of the survey data into the City's budgeting and planning processes.

STRATEGIC GOAL: VISIONARY LEADERSHIP, EFFECTIVE GOVERNANCE, AND PROACTIVE REGIONAL COLLABORATION

The City of Westminster has articulated a clear vision for the future of the community. The vision is implemented through collaborative and transparent decision making. Westminster is proactively engaged with our partners to advance the common interests of the region.

QUALITY OF LIFE AND COMMUNITY

For the first time in 2018, Westminster residents evaluated the overall image and reputation of the City of Westminster. Three-quarters of respondents rated the City's image or reputation as very good or good, 19% felt it was neither good nor bad and 6% said it was bad. These ratings were similar to those given by residents in other communities across the country and in Colorado's Front Range (see *Appendix F: Benchmark Comparisons* for more information).

Residents also indicated the extent to which they agreed or disagreed with various statements that described their image of the City of Westminster. Overall, at least three-quarters of respondents agreed with each of the eight statements. As in past years, most residents (95%) felt "beautiful parks/open spaces" described the City and more than 8 in 10 residents agreed that "financially sustainable" and "safe and secure" described their image of the City. "Dynamic, diverse economy" had relatively lower levels of agreement (76% agreed). These evaluations remained stable from 2016 to 2018; however, the City as "environmentally sensitive" declined since this question was first asked in 2012.

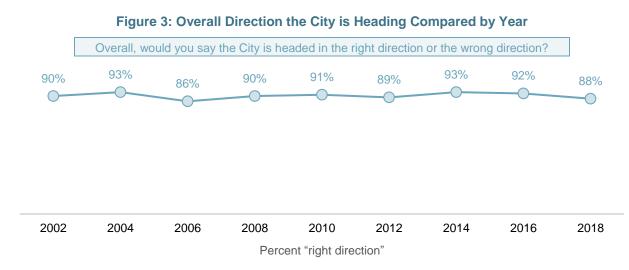

Figure 2: Image of the City Compared by Year

To what extent do you agree or disagree that each of the following statements describes your image of the City of Westminster? (Percent "strongly" or "somewhat" agree or ratings				
as top 1, 2 or 3 phrase)	2012	2014	2016	2018
Beautiful parks/open spaces	95%	93%	93%	95%
Financially sustainable	84%	92%	90%	88%
Safe and secure	82%	82%	82%	83%
Vibrant, inclusive and engaged community	NA	NA	78%	80%
Environmentally sensitive	88%	83%	81%	80%
Visionary and progressive	79%	77%	75%	79%
Ease of mobility	NA	NA	80%	77%
Dynamic, diverse economy	NA	NA	74%	76%
	1	1	1	-

Since 2012, respondents were asked the extent to which they agreed or disagreed that each statement describes their image of the City.

GOVERNMENT PERFORMANCE

Almost 9 in 10 respondents felt that the City is headed in the right direction. This rating was similar to previous years.

STRATEGIC GOAL: VIBRANT, INCLUSIVE, AND ENGAGED COMMUNITY

Westminster provides options for an inclusive, demographically diverse citizenry in unique settings with community identity, ownership and sense of place, with easy access to amenities, shopping, employment and diverse, integrated housing options. Members of the community are empowered to address community needs and important community issues through active involvement with City cultural, business and nonprofit groups..

QUALITY OF LIFE AND COMMUNITY

Westminster residents boast a high quality of life, with 87% stating it was very good or good. This evaluation was similar to prior years and was similar to the national benchmark but lower than the Front Range. About 8 in 10 respondents said that the overall quality of their neighborhood was very good or good, an increase from 2016 and similar to levels reported in 2014. This rating was higher than the national average (a comparison to the Front Range was not available).

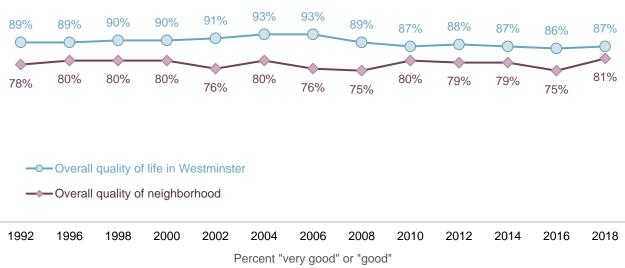

Figure 4: Overall Quality of Life and Neighborhood Compared by Year

Nine in 10 respondents said the City was a very good or good a place to live and 6 in 10 said the City was a very good or good place to retire. These ratings were similar to prior survey years and were lower than the national and Front Range averages. About three-quarters of respondents felt positively about the openness and acceptance of City programs and services toward people of diverse backgrounds and about two-thirds of respondents felt positively about the community being open and accepting of people with diverse backgrounds. These two questions were new to the 2018 survey so comparisons over time were not available. Ratings for the openness and acceptance of the community toward people of diverse backgrounds were similar to both national and Front Range averages.

Figure 5: Aspects of Quality of Life Compared by Year

CITY SERVICES

Residents viewed the library favorably, with at least 8 in 10 respondents saying it was very good or good and feeling that it was essential or very important. Evaluations remained stable from 2016 to 2018; however, the importance of the library was at an all-time high. Quality ratings for the library were lower when compared to the national and Front Range benchmarks.

	Figure 6: Qualit	y and Importance	of Librar	y Services	Compared by	Year
--	------------------	------------------	-----------	------------	-------------	------

Importance (percent "essential" or "very important")	NA	NA	NA	NA	NA	NA	NA	77%	75%	71%	77%	80%	83%

GOVERNMENT PERFORMANCE

The survey included several questions about the local government performance. About 7 in 10 residents agreed that the City government welcomes citizen involvement and about 6 in 10 respondents agreed that the City Council cares what people like them think. These ratings improved from 2016 and were the highest levels of agreement since the questions were first asked in 2008. Westminster residents gave similar ratings for the government welcoming citizen involvement compared to those in other communities across the nation and in the Front Range. (A comparison to the benchmarks was not available for "Council caring what people like me think.")

Percent "strongly" or "somewhat" agree

POTENTIAL PROBLEMS

Survey respondents assessed a number of potential problems in the City. The high cost of housing was a major or moderate problem for 7 in 10 respondents and too much growth was a concern for about 6 in 10. Both of these potential problems were more of a concern for residents in 2018 than in 2016 and have been steadily increasing since 2014. Just over one-third of residents felt homelessness was a major or moderate problem in Westminster and only 10% of respondents were concerned with a lack of growth. Concerns with lack of growth have been significantly declining since 2014.

Figure 8: Potential Problems Compared by Year

COMMUNICATION WITH RESIDENTS

Respondents indicated up to two sources of information they relied on most to get news about the City of Westminster. They could mark their first and second most relied upon sources. Social media topped the list with 28% of respondents marking it as the source they relied upon first or second most often. A similar proportion of residents used the Parks, Recreation and Libraries Activity Guide (26%); the City's website (25%); City Edition (25%); and television news (25%). Less than 4% of respondents reported using The Weekly, Cable TV Channel 8, Your Hub, or Spanish media as a first or second source for City news.

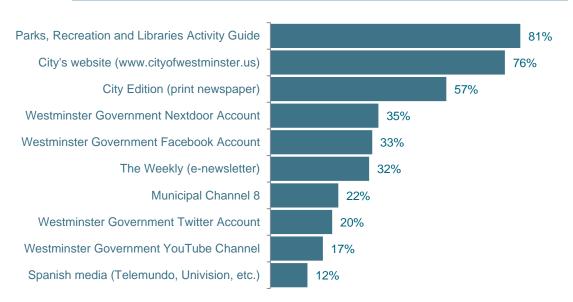

Figure 9: Preferred Information Sources, 2018

Among the sources of information listed below, mark a "1" next to the source you most	Percent	Percent
often rely on for news about the City of Westminster and mark a "2" next to the source	marking as a	marking as a
you rely on second most often.	"1" or "2"	"1"
Social media (Facebook, Twitter, Nextdoor, etc.)	28%	19%
Parks, Recreation and Libraries Activity Guide	26%	9%
City's website (www.cityofwestminster.us)	25%	12%
City Edition (print newsletter)	25%	15%
Television news	25%	15%
Other online news sources	18%	10%
Word of mouth	17%	3%
Denver Post (print version)	14%	9%
Westminster Window	11%	4%
The Weekly (e-newsletter)	3%	2%
Cable TV Channel 8	2%	1%
Your Hub	1%	0%
Spanish media (Telemundo, Univision, etc.)	0%	0%

For the first time in 2018, the survey included a question about City-specific information sources and how much residents used each to get information about City programs and services. Eight in 10 respondents used the Parks, Recreation and Libraries Activity Guide as a major or minor source for information about City programs and services. Three-quarters of respondents used the City's website as an information source and more than half used City Edition (57%). About one-third of respondents used the City's Nextdoor account, Facebook Account, and The Weekly as sources to get City information.

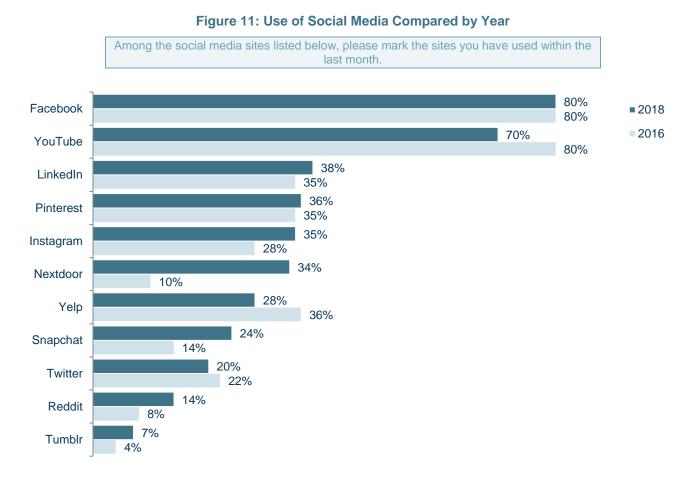

Figure 10: City Information Sources, 2018

Below is a list of resources the City of Westminster uses to put out information about City programs and services. For each potential source, please indicate if it is a major source, minor source or not a source of information for you about City programs and services.

Percent "major" or "minor" source

Exploring social media further, residents reported on their social media use in the last month. Facebook and YouTube topped the list of the social media sites used most by residents in the last month (80% and 70%, respectively). However, use of YouTube declined since 2016 while use of Facebook remained stable. About one-third of respondents had used LinkedIn, Pinterest, Instagram and Nextdoor in the month prior to the survey. A higher proportion of respondents said they had used Instagram and Nextdoor in 2018 compared to 2016. Less than 30% of respondents reported using the other social media sites in the month prior to the 2018 survey. Use of Snapchat and Reddit increased from 2016 to 2018 while use of Yelp decreased. Use of the other sites remained stable.

Total may exceed 100% as respondents could select more than one option.

Use of the City's website has more than doubled over the past 16 years, from 22% in 2002 to 58% in 2018. Website use in 2018 was similar to that in 2016.

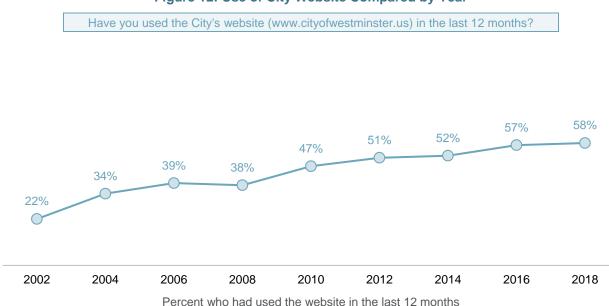

Figure 12: Use of City Website Compared by Year

Those who had used the City's website in the 12 months prior to the survey evaluated five aspects of the site. A majority of respondents felt that the current information and appearance was very good or good (86% and 84%, respectively). About three-quarters gave positive marks to the online services offered and two-thirds felt the ease of navigation was of high quality. The search function was favorably rated by 64% of respondents. Improvements were seen from 2016 to 2018 for the website's appearance, online services offered, and the search function, which could be, in part, to updates made to the City's website in the fall of 2017. Ratings for the other aspects of the City's website were similar to 2016.

Figure 13: Ratings of Aspects of City's Website Compared by Year

If you used the City's website in the last 12 months, please rate the following aspects. Circle the number that best represents your opinion.						
(Percent "very good" or "good")	2008	2010	2012	2014	2016	2018
Current information	83%	84%	84%	79%	82%	86%
Appearance	76%	84%	81%	74%	72%	84%
Online services offered	63%	76%	75%	70%	70%	76%
Ease of navigation	63%	70%	71%	63%	64%	67%
Search function	61%	62%	62%	59%	58%	64%

Asked only of those who reported having used the City's Web site in the last 12 months

STRATEGIC GOAL: BEAUTIFUL, DESIRABLE, SAFE, AND ENVIRONMENTALLY RESPONSIBLE CITY

Westminster thoughtfully creates special places and settings. The City is an active steward, protecting and enhancing natural resources and environmental assets. The City promotes and fosters safe and healthy communities.

QUALITY OF LIFE AND COMMUNITY

Most Westminster residents viewed the City as a very good or good place to raise children, which has remained stable since 2010. However, respondents gave evaluations that were lower than the national and Front Range averages. About half of respondents felt the quality of local public schools in Westminster was very good or good. This evaluation was lower than 2016 and lower than the benchmarks.

Figure 14: Aspects of Quality of Life Compared by Year

Please rate each of the following aspects of Westminster. (Percent "very good" or "good")	2010	2012	2014	2016	2018
Westminster as a place to raise children	81%	84%	84%	78%	82%
Quality of local public schools in Westminster	NA	NA	NA	62%	55%

FEELINGS OF SAFETY

Residents provided their perceptions of safety from crimes and residential fires. About 8 in 10 respondents felt very or somewhat safe from residential fires and violent crimes in Westminster; 6 in 10 reported feeling safe from property crimes. These evaluations were similar to prior survey years. The rating for safety from violent crimes was similar to the nation but lower than the Front Range while safety from property crimes was lower than both comparisons. (Benchmarks for safety from residential fires were not available.)

Figure 15: Safety Ratings Compared by Year

Please rate how safe or unsafe you feel from the following: (Percent "very" or "somewhat" safe)	2006	2008	2010	2012	2014	2016	2018
Residential fires	84%	84%	84%	84%	83%	85%	84%
Violent crimes (e.g., rape, robbery, assault)	80%	80%	85%	81%	81%	80%	80%
Property crimes (e.g., burglary, theft, vandalism, auto theft)	58%	60%	66%	61%	64%	63%	60%
Prior to 2018 "residential fires" was worded as "fires"							

Prior to 2018 "residential fires" was worded as "fires".

CITY SERVICES

Residents assessed the quality and importance of 26 services provided by the City. Of these 26 services, 16 fall under the 2017 Strategic Plan goal of Beautiful, Desirable, Safe, and Environmentally Responsible City. Overall, at least half of respondents gave positive reviews to the quality of each of the 16 services. The highest rated services related to life and safety services and parks and recreation, including fire protection (91% very good or good), EMS (91%), and recreation programs (87%), among others. As in many communities, the services deemed of lower quality included building permits/inspections (57%) and City Code enforcement (52%).

Overall, the quality of these services remained stable from 2016 to 2018. However, the quality of the Municipal Court and animal management increased from 2016 to 2018. When reviewing longer trends (when the question was first asked), the quality of many services has increased by 10 percentage points or more including EMS, emergency preparedness, Municipal Court, recycling drop off centers at City facilities, building permits/inspections, and City Code enforcement.

All 16 services could be compared to the national benchmark; five services were rated higher (e.g., code enforcement and recreation programs and facilities); seven were similar (e.g., police traffic enforcement, trails, and drinking water); and four were lower (e.g., recycling drop off centers, EMS, police protection, and fire protection). The 15 services that could be compared to the Front Range average produced similarly mixed results with three services rated higher in quality (e.g., traffic enforcement and emergency preparedness); five rated similar (e.g., animal management and Municipal Court); and six rated lower (e.g., police protection, fire protection, trails, and park maintenance).

Figure 16: Quality of City Services Compared by Year

Between 30% and 47% of respondents said "don't know" when rating the quality of recycling drop off centers, the Municipal Court, emergency preparedness, City Code enforcement, and building permits/inspections (see Appendix A: Complete Set of Survey Responses for all responses including "don't know").

Residents evaluated the importance of the same 16 services. Most were seen as essential or very important by a majority of respondents. Again, safety and life services topped the list with at least 9 in 10 residents saying these were essential or very important. Services that were relatively less important to residents included City code enforcement and animal management.

Compared to 2016, residents placed similar levels of importance to these services in 2018. However, the importance of recycling drop off centers and animal management increased between the two survey years, with the importance of recycling drop off centers at an all-time high (68% essential or very important). When looking at importance ratings over the last decade several have increased including police traffic enforcement, trails, and animal management.

Figure 17: Importance of City Services Compared by Year

For the first time in 2018, the survey included two questions about familiarity with City emergency communication systems and whether residents had plans in place for emergencies. About half of respondents were familiar with the Emergency Alerting System (EAS) and Code Red (reverse 911). Between one-quarter and one-third of residents said that they had an emergency preparedness kit, a family evacuation plan, and a shelter-in-place plan.

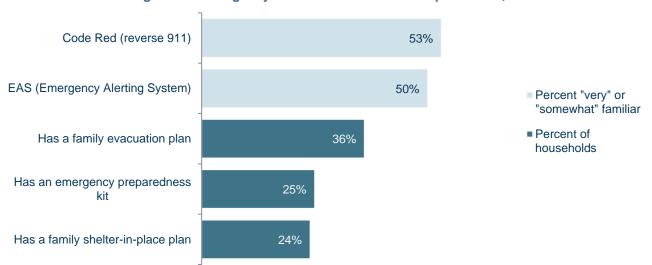

Figure 18: Emergency Communications and Preparedness, 2018

POTENTIAL PROBLEMS

Residents provided their perceptions on 13 potential problems in Westminster. Four of the 13 potential problems fall under the Strategic Plan goal of a Beautiful, Desirable, Safe, and Environmentally Responsible City. About half of respondents felt that crime was a major or moderate problem and about one-quarter said that the poor maintenance and condition of homes and the poor condition of properties were a problem. Only 9% of respondents felt that the lack of availability of recreation facilities was a concern. Where comparisons could be made to prior survey years, ratings were similar.

Figure 19: Potential Problems Related to Beautiful, Desirable, Safe, and Environmentally Responsible City Compared by Year

To what degree, if at all, are the following problems in Westminster? (Percent "major" or "moderate" problem)	2004	2006	2008	2010	2012	2014	2016	2018
Crime (vandalism, graffiti, drugs)	NA	52%						
Poor maintenance and condition of homes	20%	20%	36%	26%	31%	31%	30%	28%
Poor condition of properties (weeds, trash, junk vehicles)	24%	23%	39%	28%	35%	33%	31%	27%
Lack of availability of recreation facilities	NA	NA	NA	NA	NA	NA	12%	9%

Prior to 2018, "crime" was three separate questions (vandalism, graffiti and drugs) so a comparison over time cannot be made.

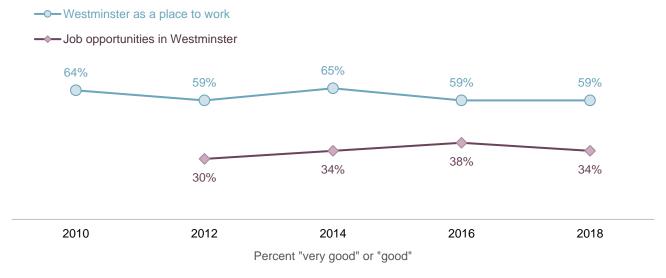

STRATEGIC GOAL: DYNAMIC, DIVERSE ECONOMY

Westminster is a local government that fosters social, economic and environmental vitality and cultivates and strengthens a wide array of economic opportunities.

QUALITY OF LIFE AND COMMUNITY

About three out of five residents felt that the City was a very good or good place to work and one-third felt there were very good or good job opportunities in Westminster. These ratings were similar to 2016. The City as a place to work received ratings that were similar to the national and Front Range averages, while job opportunities received ratings higher than the nation and similar to the Front Range.

Figure 20: Place to Work and Employment Opportunities Compared by Year

CITY SERVICES

Two of the 26 City services assessed on the survey related to the economy. Six in 10 residents felt economic development in Westminster was very good or good and about 5 in 10 said land use, planning and zoning was at least good. These ratings were similar to past survey years and were higher than both the national and Front Range comparisons, About 8 in 10 respondents felt each of these services was essential or very important. Importance evaluations for economic development was similar to past years, while the importance of land use, planning, and zoning increased and was at the highest levels reported since 2008.

STRATEGIC GOAL: EASE OF MOBILITY

Westminster pursues multi-modal transportation options to ensure the community is convenient, accessible and connected by local and regional transportation options through planning, collaboration, advocacy and execution. Transportation objectives include walkability, bike friendly, drivability, and mass-transit options.

CITY SERVICES

Three of the 26 City services fall under the Ease of Mobility Strategic Plan goal. About 5 in 10 residents gave favorable evaluations to snow removal and street cleaning (59% and 55%, respectively) and 4 in 10 felt positively about street repair (44%). Ratings for street cleaning were similar to 2016. Snow removal evaluations have been trending down since 2014 (from 71% in 2014 to 59% in 2018) and ratings for street repair declined over the last two years to its lowest levels since this question was first asked in 1992. Quality ratings for street repair were similar compared to the national and Front Range benchmarks, while ratings of street cleaning were lower than both comparisons. Snow removal was rated lower than the national average but similar to the Front Range.

About 9 in 10 residents felt that street repair and snow removal were essential or very important, on par with 2016 ratings. The importance of street cleaning increased from 51% in 2016 to 63% in 2018.

POTENTIAL PROBLEMS

Three of the 13 potential problems related to Ease of Mobility. One-third of respondents felt that traffic safety on major streets was a major or moderate problem while about one-quarter felt traffic safety on neighborhood streets was a problem. The unavailability of trails or trail connections was less of a concern (9% major or moderate problem). These ratings were similar to 2016.

STRATEGIC GOAL: FINANCIALLY SUSTAINABLE GOVERNMENT PROVIDING EXCELLENCE IN CITY SERVICES

Westminster leads the region in a culture of innovation that exceeds expectations in providing value in all city services – the City shall be known for "the Westy Way."

CITY SERVICES

Overall, residents gave high marks to the quality of City services, with 81% rating it as very good or good. This was similar to prior survey years and similar to both benchmarks.

Services related to financial sustainability and excellent City services included sewer services, utility billing/meter reading and the overall customer service provided by City employees. About 8 in 10 residents gave very good or good reviews to sewer services and the overall customer service of City employees. Two-thirds of respondents favorably rated utility billing and meter reading. Evaluations of sewer services and utility billing increased from 2016 to 2018 while ratings of customer service stayed the same. Compared to the benchmarks, these quality evaluations generally were on par with peer communities with the exception of utility billing/meter reading, which was lower than the Front Range.

Ninety-one percent of residents rated sewer services as essential or very important and 81% felt that the overall customer service provided by Westminster employees was at least very important. Utility billing/meter reading was relatively less important (69% rated as essential or very important). Ratings were stable over time.

GOVERNMENT PERFORMANCE

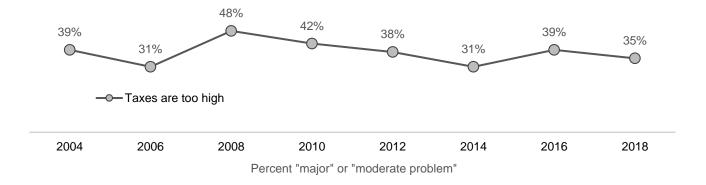

Many survey respondents agreed (68%) that they received good value for the City of Westminster taxes they pay. This trend was similar to 2016 and has remained relatively stable over time. Evaluations given by Westminster residents were higher than the national and Front Range averages.

POTENTIAL PROBLEMS

About one-third of respondents felt that taxes being too high was a major or moderate problem in Westminster. This rating this was similar to 2016.

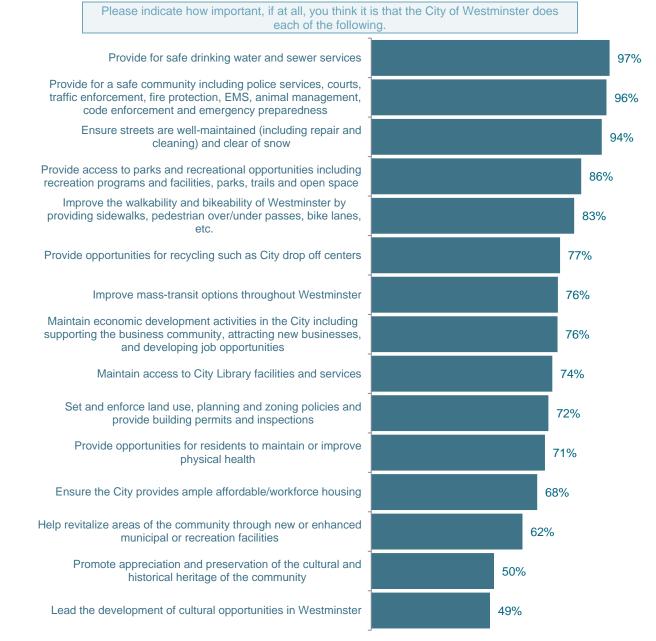

Figure 30: Taxes as a Potential Problem Compared by Year

RESIDENT PRIORITIES

Residents evaluated the importance of 15 different goals or services identified by the City of Westminster and, generally, a majority of respondents felt each was essential or very important for the City to do. Nearly all respondents felt that providing safe drinking water and sewer services and providing for a safe community were essential or very important (97% and 96% respectively). Another 9 in 10 respondents felt it was essential or very important for the City of Westminster to ensure streets are well-maintained and clear of snow. About 8 in 10 said that providing access to parks and recreational opportunities (86%) and improving the walkability and bikeability of Westminster (84%) was at least very important. Residents placed a lower priority on promoting appreciation and preservation of the cultural and historical heritage of the community (50%) and leading the development of cultural opportunities (49%).

Figure 31: Importance of Issues Related to Vibrant, Inclusive, and Engaged Community, 2018

Percent "essential" or "very important"

BALANCING QUALITY AND IMPORTANCE

Most government services are considered to be important, but when competition for limited resources demands that efficiencies or cutbacks be instituted, it is wise not only to know what services are deemed most important to residents' quality of life, but which services among the most important are perceived to be delivered with the lowest quality. It is these services – more important services delivered with lower quality – to which attention needs to be paid first.

To help guide City staff and officials with decisions on future resource allocation, resident ratings of the importance of City services were compared to their ratings of the quality of these services (see the chart on the next page). To identify the services perceived by residents to have relatively lower quality at the same time as relatively higher importance, all services were ranked from highest perceived quality to lowest perceived quality and from highest perceived importance. Some services were in the top half of both lists (higher quality and higher importance); some were in the top half of one list but the bottom half of the other (higher quality and lower importance or lower quality and higher importance); and some services were in the bottom half of both lists.

Services were classified as "more important" if they were rated as essential or very important by 71% or more of respondents. Services were rated as "less important" if they received a rating of less than 71%. Services receiving quality ratings of very good or good by 81% or more of respondents were considered of "higher quality" and those with ratings lower than 81% were considered to be of "lower quality." This classification divided the services in half.

Services categorized as higher in importance and lower in quality included snow removal, street repair, economic development, and traffic enforcement. Snow removal and street repair both declined in quality from 2016 to 2018. Additionally, snow removal was lower than the national benchmark (but similar to the Front Range). These services may warrant further investigation to see if changes to their delivery are necessary.

City services that were rated higher in both importance and quality were drinking water, fire protection, EMS/ambulance, police protection, sewer services, preservation of natural areas, libraries, overall customer service provided by City employees, and emergency preparedness. Emergency preparedness shifted up from lower quality and higher importance from 2016 to 2018.

Services that were deemed lower in importance, but higher in quality included trails, recreation programs, recreation facilities, and park maintenance.

The lower importance/lower quality City services were land use, planning, and zoning; municipal court; utility billing; code enforcement; building permits/inspections; recycling drop off centers; animal management; and street cleaning.

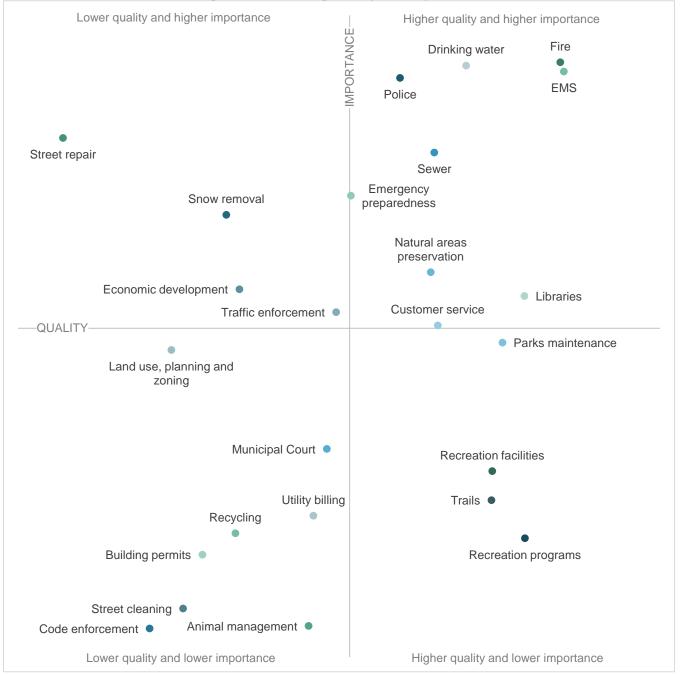

Figure 32: Balancing Quality and Importance

APPENDIX A: COMPLETE SET OF SURVEY RESPONSES

The following pages contain a complete set of responses to each question on the survey. The percent of respondents giving a particular response is shown followed by the number of respondents. When a question includes a "don't know" response option, the first table displays the results excluding the "don't know" responses and the second table displays the results with the "don't know."

APPENDIX B: VERBATIM RESPONSES TO OPEN-ENDED QUESTION

Following are verbatim responses to the open-ended question on the survey. Because these responses were written by survey participants, they are presented here in verbatim form, including any typographical, grammar or other mistakes. The responses are grouped in alphabetical order.

Question 11: Other source (please specify)

- Any mailed item
- Atravez de los grupos comunitarios y organizaciones sin fines de lucro (Through community groups and non-profit organizations)
- Bank of food
- City, Adams County direct mailing, major source
- Denver Post
- Didn't know most was available
- Don't know of these
- Email from city dept.
- From HOA meetings
- Google
- Legacy Ridge Lifestyles
- Local new tv
- Local tv
- Mailed publications
- Mailings
- Mayor's weekly email
- Monthly paper
- Neighbors
- Neighbors
- Neighbors, acquaitances, coworkers
- Nerosmax magazine, tv. News
- Newspaper
- Ring
- Some news, friends, neighbors
- Television news didn't know there is a newspaper
- Unaware of these
- Water bill inserts
- We do not have a computer or toys
- Westminster newspaper
- Westminster radio and the Westminster TV screen at the city park fitness center
- Westminster Window
- Westminster Window
- Westminster Window 1
- Westminster Window 1
- Will try the Nextdoor
- Yourhub-provide on line

APPENDIX C: COMPARISONS OF SELECT QUESTIONS BY RESPONDENT CHARACTERISTICS

For most of the questions, only one number for each question in these subgroup comparison tables is shown for ease of comparison. These summarized responses show only the proportion of respondents giving a certain answer; for example, the percent of respondents who "strongly" or "somewhat" supported moving the library.

The subgroup comparison tables contain the cross tabulations of survey questions by selected respondent characteristics. Chi-square or ANOVA tests of significance were applied to these breakdowns of survey questions. A "p-value" of 0.05 or less indicates that there is less than a 5% probability that differences observed between groups are due to chance; or in other words, a greater than 95% probability that the differences observed in the selected categories of the sample represent "real" differences among those populations.

For each pair of subgroups that has a statistically significant difference, an upper case letter denoting significance is shown in the category with the larger column proportion. The letter denotes the category with the smaller column proportion from which it is statistically different. Differences were marked as statistically significant if the probability that the differences were due to chance alone were less than 5%. Categories were not used in comparisons when a column proportion was equal to zero or one.

Items that have no upper case letter denotation in their column and that are also not referred to in any other column were not statistically different.

For example, in Table 39 on the following page, 71% of respondents age 55 and over (C) rated Westminster as a very good or good place to retire. This proportion of respondents (C) was statistically significantly higher than respondents age 18 to 34 (A) and age 35 to 54 (B). In another example. In Table 40, respondents age 18 to 34 (A) rated the ease of mobility significantly higher than respondents age 35 to 54 (B).

COMPARISONS BY RESPONDENT AGE

Notable trends in responses by age included the following:

- Older residents (age 55 and over) tended to provide more positive responses to many of the evaluative questions related to community amenities and government service provision.
- When given the list of community issues such as crime and homelessness, younger residents (age 18 to 34) reported the severity of these problems as lesser than their older counterparts.
- Satisfaction with the City's website and its social media outlets was strongest for the younger residents (age 18 to 34), followed by those 35 to 54 years. Middle-aged residents gave higher ratings to Nextdoor, while older adults (age 55 and over) were more favorable towards City Edition.
- Younger residents (18-34 years) rated economic development and land use, planning, and zoning as less important than older Westminster residents.

Table 39: Question 1

COMPARISON BY TYPE OF HOUSING

Notable trends in responses by housing unit type included the following:

- Residents living in attached units were more positive about Westminster as a place to work and the openness and acceptance of the community toward people of diverse backgrounds.
- Detached unit dwellers felt a stronger connection between Westminster's image of financial sustainability, while attached unit dwellers felt a stronger connection to the City as visionary and dynamic.
- Ratings of government service delivery varied by service type, but residents in attached units gave significantly higher ratings to code enforcement; land use, planning, and zoning; and street maintenance (repair, cleaning and snow removal).
- Attached unit dwellers were more likely to agree that the City is moving in the right direction and provided higher ratings to the City's caring about what "people like me think."
- Residents living in detached units gave higher importance ratings to City involvement in land use, planning, and zoning, while residents in attached units rated the importance of physical activities, cultural opportunities, and affordable housing higher.

Ensure the City provides ample affordable/workforce housing	62%	79% A	68%

Table 56: Question 15

COMPARISONS BY HOUSEHOLD INCOME

Notable trends in responses by income included the following:

- Higher income residents (\$100,000 or more) rated the openness and acceptance of the community toward people of diverse backgrounds less favorably than residents from lower incomes.
- Residents in moderate income households (\$25,000 to \$99,999) reported feeling less safe from violent crimes than higher income residents. Residents in higher income household rated the police more favorably than moderate income households.
- Residents in households making less the \$25,000 per year were more likely to agree with the statement that the City listens to "people like me." However, they felt high taxes were more of a problem in the community than their moderate and higher income counterparts.
- Residents living higher income households gave higher importance ratings to City involvement in providing parks and recreation. Residents in moderate and lower income households gave higher importance to affordable workforce housing; as income levels decreased, the importance of affordable housing increased.

COMPARISONS BY LENGTH OF RESIDENCY

Notable trends in responses by length of residency included the following:

- Although response patterns varied, residents living in the City for 20 or more years rated most of the • community amenities higher than people living in the community for less time. Those living in the City for 5 to 9 years tended to be the least positive about community amenities, although most differences were not statistically significant.
- The overall guality of City services was rated the highest by residents living in the community 15 or more • years.
- Residents living in Westminster less than four years were more likely to agree with the statement that the City . is moving in the "right direction."

APPENDIX D: COMPARISONS OF SELECT QUESTIONS BY SCHOOL DISTRICT

Notable trends in responses by school district included the following:

- Residents in the Westminster School District gave less positive ratings to the City as a place to live, their neighborhood, the City as a place to raise kids, and their local schools.
- Jefferson County residents tended to give lower ratings to government services than residents in the other school districts, although the differences were only statistically significant for services related to public safety.
- When given the list of community issues such as traffic safety and code enforcement, Westminster School District residents reported the severity of many of these problems as greater than their counterparts.
- Satisfaction with the City's website and its social media outlets was strongest for residents in the Westminster School District.
- Adams 12 residents rated economic development more important and cultural and historic preservation as less important than other Westminster residents.

APPENDIX F: BENCHMARK COMPARISONS

UNDERSTANDING THE BENCHMARK COMPARISONS

Communities use the comparative information provided by benchmarks to help interpret their own resident survey results, to create or revise community plans, to evaluate the success of policy or budget decisions and to measure local government or organizational performance. Taking the pulse of the community has little meaning without knowing what pulse rate is too high and what is too low. When surveys of service satisfaction turn up "good" resident evaluations, it is necessary to know how others rate their services to understand if "good" is good enough or if most other communities are "very good." Furthermore, in the absence of national or peer community comparisons, a community is left with comparing its police protection rating to its street maintenance rating. That comparison is unfair as street maintenance always gets lower ratings than police protection. More illuminating is how residents' ratings of police service compare to opinions about police service in other communities and to resident ratings over time.

A police department that provides the fastest and most efficient service – one that closes most of its cases, solves most of its crimes, and keeps the crime rate low – still has a problem to fix if the residents in the community rate police services lower than ratings given by residents in other cities with objectively "worse" departments. Benchmark data can help that police department – or any department – to understand how well citizens think it is doing.

While benchmarks help set the basis for evaluation, resident opinion should be used in conjunction with other sources of data about budget, population demographics, personnel, and politics to help administrators know how to respond to comparative results.

COMPARISON DATA

NRC has designed a method for quantitatively integrating the results of surveys that we have conducted with those that others have conducted. These integration methods have been described thoroughly in *Public Administration Review, Journal of Policy Analysis and Management,* and in NRC's first book on conducting and using citizen surveys, *Citizen Surveys: how to do them, how to use them, what they mean,* published by the International City/County Management Association (ICMA). Scholars who specialize in the analysis of citizen surveys regularly have relied on NRC's work.^{1,2} The method described in those publications is refined regularly and statistically tested on a growing number of resident surveys in NRC's proprietary databases.

Communities in NRC's benchmark database are distributed geographically across the country and range from small to large in population size. Comparisons may be made to all communities in the database or to a subset. Despite the differences in characteristics across communities, all are in the business of providing services to residents. Though individual community circumstances, resources, and practices vary, the objective in every community is to provide services that are so timely, tailored, and effective residents conclude the services are of the highest quality. High ratings in any community, like SAT scores in any teen household, bring pride and a sense of accomplishment.

NRC's database of comparative resident opinion is comprised of resident perspectives gathered in citizen surveys from more than 600 communities whose residents evaluated local government services and gave their opinion about the quality of community life. The comparison evaluations are from the most recent survey completed in each jurisdiction; most communities conduct surveys every year or in alternating years. NRC adds the latest results quickly upon survey completion, keeping the benchmark data fresh and relevant. The City of Westminster chose to have comparisons made to the entire database as well as to communities in the Front Range.

¹ Kelly, J. & Swindell, D. (2002). Service quality variation across urban space: First steps towards a model of citizen satisfaction, Journal of Urban Affairs, 24, 271-288.

² Van Ryzin, G., Muzzio, D., Immerwahr, S., Gulick, L. & Martinez, E. (2004). Drivers and consequences of citizen satisfaction: An application of the American Customer Satisfaction Index Model to New York City, Public Administration Review, 64, 331-341.

PUTTING EVALUATIONS ONTO THE 100-POINT SCALE

Although responses to many of the evaluative questions were made on a five-point scale with 1 representing the best rating and 5 the worst, the benchmarks are calculated on a common scale where 0 is the worst possible rating and 100 is the best possible rating. The margin of error around an average score on the 100-point scale is no greater than plus or minus three points based on all respondents.

The 100-point scale is not a percent. It is a conversion of responses to an average rating. Each response option is assigned a value that is used in calculating the average score. For example, "very good"=100, "good"=75, "neither good nor bad"=50, "bad"=25, and "very bad"=0. If everyone reported "very good," then the average rating would be 100 on the 100-point scale. Likewise, if all respondents gave a "very bad" rating, the result would be 0 on the 100-point scale. If half the respondents gave a score of "very good" and half gave a score of "very bad," the average would be 50, in the middle of the scale (like the center post of a teeter totter) or "neither good nor bad." An example of how to convert survey frequencies into an average rating appears below.

How do you rate the community as a place to live?						
Response option	Total with "don't know"	Step1: Remove "don't know" responses	Total without "don't know"	Step 2: Assign scale values	Step 3: Multiply % by scale value	Step 4: Sum to calculate average rating
Very good	15%	=15÷(100-2)=	15.3%	100	=15.3% x 100 =	15.3
Good	53%	=53÷(100-2)=	54.1%	75	=54.1% x 75 =	40.6
Neither good nor bad	26%	=26÷(100-2)=	26.5%	50	=26.5% x 50 =	13.3
Bad	3%	=3÷(100-2)=	3.1%	25	=3.1% x 25 =	0.8
Very bad	0%	=0÷(100-2)=	0%	0	=0% x 0 =	0
Don't know	2%					
Total	100%		100%			70

Table 89: Example of Converting Responses to the 100-point Scale

INTERPRETING THE RESULTS

Average ratings are compared when questions similar to those asked in the Westminster survey are included in NRC's database, and there are at least five jurisdictions in which the question was asked.

Where comparisons for quality ratings were available, the City of Westminster's results were noted as being "higher" the benchmark, "lower" the benchmark or "similar" to the benchmark. In instances where ratings are considerably higher or lower than the benchmark, these ratings have been further demarcated by the attribute of "much," (for example, "much lower" or "much higher"). These labels come from a statistical comparison of Westminster's rating to the benchmark where a rating is considered "similar" if it is within the margin of error (three points or less on the 100-point scale); "higher" or "lower" if the difference between Westminster's rating and the benchmark is greater than the margin of error (greater than three points but six points or less); and "much higher" or "much lower" if the difference between Westminster's rating and the benchmark is more than twice the margin of error (greater than six points).

Comparisons are provided at the national level and to other communities in Colorado's Front Range.

COMMUNITIES INCLUDED IN THE FRONT RANGE COMPARISON

The communities included in the Front Range comparisons are listed below, along with the 2010 Census population.

Adams County, CO Arapahoe County, CO Arvada city, CO Aurora city, CO	572,003 106,433
Boulder city, CO	
Brighton city, CO	
Broomfield city, CO	
Castle Pines North city, CO	
Castle Rock town, CO	
Centennial city, CO	
Commerce City city, CO	45,913
Dacono city, CO	
Denver city, CO	600,158
Douglas County, CO	285,465
Edgewater city, CO	5,170
Englewood city, CO	30,255
Erie town, CO	18,135
Fort Collins city, CO	143,986

APPENDIX G: SURVEY METHODOLOGY

DEVELOPING THE QUESTIONNAIRE

General citizen surveys, such as this one, ask recipients for their perspectives about the quality of life in the City, their use of City amenities, their opinion on policy issues facing the City, and their assessment of City service delivery. The 2018 Westminster Resident Survey is the fourteenth iteration of the survey since it was first administered by National Research Center, Inc. (NRC) in 1992. To preserve trends over time, the 2016 survey served as the foundation for the 2018 resident survey instrument. Questions that asked about topics found to be less salient in 2018 were eliminated and a list of topics for new questions was generated. All questions were prioritized and an optimal composition of topics and questions were selected to be included on the final survey. Through this iterative process between City staff and NRC staff, a final five-page questionnaire was created. The City of Westminster funded this research. Please contact Theresa Booco of the City of Westminster at tbooco@CityofWestminster.us if you have any questions about the survey.

SELECTING SURVEY RECIPIENTS

"Sampling" refers to the method by which survey recipients are chosen. The "sample" refers to all those who were given a chance to participate in the survey. All households located in the city boundaries were eligible for the survey. Because local governments generally do not have inclusive lists of all the residences in the jurisdiction (tax assessor and utility billing databases often omit rental units), lists from the United States Postal Service (USPS), updated every three months, usually provide the best representation of all households in a specific geographic location. A list of all households within the zip codes serving Westminster was purchased from Go-Dog Direct based on updated listings from the USPS.

A larger list than needed was pulled so that a process referred to as "geocoding" could be used to eliminate addresses from the list that were outside the study boundaries. Geocoding is a computerized process in which addresses are compared to electronically mapped boundaries and coded as inside or outside desired boundaries. All addresses determined to be outside the study boundaries were eliminated from the potential mailing list.

A stratified, systematic sampling method was used with the remaining addresses to create a mailing list of 3,000 Westminster households, so that the number of surveys sent to each of the three school districts was roughly equal to the proportion of all households in each district (Jefferson County 39%, Adams 12 32% and Westminster 29%). Attached units within each district were oversampled to compensate for detached unit residents' tendency to return surveys at a higher rate.

An individual within each household was selected using the birthday method (asking the adult in the household who most recently had a birthday to complete the questionnaire). The underlying assumption in this method is that day of birth has no relationship to the way people respond to surveys. This instruction was contained in the cover letter accompanying the questionnaire.

In addition to the scientific, random selection of households, a link to an online "opt-in" survey was publicized and posted to the City of Westminster website as well as the City's social media sites. This opt-in survey was identical to the scientific survey and open to all Westminster residents. The data presented in this report exclude the opt-in survey data. The opt-in data can be found in the *Supplemental Online Survey Results* provided under separate cover.

SURVEY ADMINISTRATION AND RESPONSE

Each selected household was contacted three times beginning January 29, 2018. First, a prenotification announcement informing the household members that they had been selected to participate in the survey was sent. Approximately one week after mailing the prenotification, each household was mailed a survey containing a cover letter signed by the Mayor enlisting participation. The packet also contained a postage-paid return envelope in which the survey recipients could return the completed questionnaire to NRC. A reminder letter and survey, scheduled to arrive one week after the first survey was the final contact. The cover letters included a web link where respondents could complete the survey online if they preferred. The second cover letter asked those who had not completed the survey to do so and those who had already done so to refrain from turning in another survey. The survey was available in English (hard copy and online) and Spanish (online only). Both cover letters

contained paragraphs in Spanish instructing participants to complete the Spanish version of the survey online. Completed surveys were collected over the following five weeks. The online "opt-in" survey became available to all residents on February 23 and remained open for two weeks.

About 4% of the 3,000 surveys were returned because the housing unit was vacant or the postal service was unable to deliver the survey as addressed. Of the 2,890 households receiving a survey, 616 completed the survey, providing an overall response rate of 21%. Of the 616 completed surveys, 44 were completed online (four of which were completed in Spanish). Responses also were tracked by the three School Districts that serve the city; response rates by Council District ranged from 19% to 23%. The response rates were calculated using AAPOR's response rate #2³ for mailed surveys of unnamed persons. Additionally, 899 residents completed the online opt-in survey and all were completed in English; results of the opt-in survey can be found in the *Supplemental Online Survey Results* report provided under separate cover.

	Jefferson County	Adams 12	Westminster	Overall
Total sample used	1,170	960	870	3,000
I=Complete Interviews	265	190	152	607
P=Partial Interviews	2	4	3	9
R=Refusal and break off	3	2	2	7
NC=Non Contact	0	0	0	0
O=Other	0	0	0	0
UH=Unknown household	0	0	0	0
UO=Unknown other	870	725	671	2,266
Response rate: (I+P)/(I+P) + (R+NC+O) + (UH+UO)	23%	21%	19%	21%

Table 40: Survey Response Rates by School District

95% CONFIDENCE INTERVALS

It is customary to describe the precision of estimates made from surveys by a "level of confidence" and accompanying "confidence interval" (or margin of error). A traditional level of confidence, and the one used here, is 95%. The 95% confidence interval can be any size and quantifies the sampling error or imprecision of the survey results because some residents' opinions are relied on to estimate all residents' opinions.⁴

The margin of error for the City of Westminster survey is no greater than plus or minus four percentage points around any given percent reported for all respondents (616 completed surveys).

For each of the three school districts in Westminster (Jefferson County, Adams 12 or Westminster), the margin of error rises to approximately plus or minus 10% since the number of respondents were approximately 267 for Jefferson County, 194 for Adams 12 and 155 for Westminster. Comparisons by respondent demographics have margins of error ranging from plus or minus 5% for 450 respondents to as much as plus or minus 14% for approximately 50 respondents.

SURVEY PROCESSING (DATA ENTRY)

Upon receipt, completed surveys were assigned a unique identification number. Additionally, each survey was reviewed and "cleaned" as necessary. For example, a question may have asked a respondent to pick two items out of a list of five, but the respondent checked three; in this case, NRC would use protocols to randomly choose two of the three selected items for inclusion in the dataset.

³ See AAPOR's Standard Definitions here: http://www.aapor.org/Standards-Ethics/Standard-Definitions-(1).aspx for more information

⁴ A 95% confidence interval indicates that for every 100 random samples of this many residents, 95 of the confidence intervals created will include the "true" population response. This theory is applied in practice to mean that the "true" perspective of the target population lies within the confidence interval created for a single survey. For example, if 75% of residents rate a service as "excellent" or "good," then the 4% margin of error (for the 95% confidence interval) indicates that the range of likely responses for the entire community is between 71% and 79%. This source of uncertainty is called sampling error. In addition to sampling error, other sources of error may affect any survey, including the non-response of residents with opinions different from survey responders.

All surveys then were entered twice into an electronic dataset; any discrepancies were resolved in comparison to the original survey form. Range checks as well as other forms of quality control were also performed.

NRC used SurveyGizmo, a web-based survey and analytics platform, to collect the online survey data. Use of an online system means all collected data are entered into the dataset when the respondents submit the surveys. Skip patterns are programmed into system so respondents are automatically "skipped" to the appropriate question based on the individual responses being given. Online programming also allows for more rigid control of the data format, making extensive data cleaning unnecessary.

A series of quality control checks were also performed in order to ensure the integrity of the web data. Steps may include and not be limited to reviewing the data for clusters of repeat IP addresses and time stamps (indicating duplicate responses) and removing empty submissions (questionnaires submitted with no questions answered).

WEIGHTING THE DATA

The demographic characteristics of the survey respondents were compared to those found in the 2010 Census and the 2014 American Community Survey (ACS) 5-year estimates for adults in the city. Survey results were weighted using the population norms and normative data for the school districts (provided by the City) to reflect the appropriate percent of those residents and geographic areas in the city. Other discrepancies between the whole population and the survey respondents were also aided by the weighting due to the intercorrelation of many socioeconomic characteristics.

The variables used for weighting were respondent gender, age, tenure (rent versus own), housing unit type (attached versus detached), ethnicity, race and school district. This decision was based on:

- The disparity between the survey respondent characteristics and the population norms for these variables
- The saliency of these variables in differences of opinion among subgroups
- The historical profile created and the desirability of consistently representing different groups over the years

Several different weighting "schemes" are tested to ensure the best fit for the data.

The weighting process actually begins at the point of sampling. Knowing that residents in single family dwellings are more likely to respond to a mail survey, NRC oversamples residents of multi-family dwellings to ensure they are accurately represented in the sample data. Rather than giving all residents an equal chance of receiving the survey, this is systematic, stratified sampling, which gives each resident of the community a known chance of receiving the survey (and apartment dwellers, for example, a greater chance than single family home dwellers). As a consequence, results must be weighted to recapture the proper representation of multi-family housing dwellers.

The results of the weighting scheme are presented in the table on the following page. No adjustments were made for design effects.

Characteristic	Population Norm ¹	Unweighted Data	Weighted Data
Housing			
Rent home	35%	16%	34%
Own home	65%	84%	66%
Detached unit ²	63%	72%	63%
Attached unit ²	37%	28%	37%
Race and Ethnicity			
White	84%	87%	82%
Not White	16%	13%	18%
Hispanic	18%	12%	16%
Not Hispanic	82%	88%	84%
White alone, not Hispanic	74%	80%	74%
Hispanic and/or other race	26%	20%	26%
Sex and Age			
18-34 years of age	34%	13%	32%
35-54 years of age	39%	25%	38%
55+ years of age	27%	62%	30%
Female	51%	54%	52%
Male	49%	46%	48%
Females 18-34	17%	8%	17%
Females 35-54	20%	14%	19%
Females 55+	15%	31%	16%
Males 18-34	17%	5%	17%
Males 35-54	19%	11%	18%
Males 55+	12%	31%	13%
School District ³			
Jefferson County	39%	43%	39%
Adams 12	32%	31%	32%
Westminster	29%	25%	29%

ANALYZING THE DATA

The electronic dataset was analyzed by NRC staff using IBM's Statistical Package for the Social Sciences (SPSS). For the most part, frequency distributions and the "percent positive" (i.e., "very good" or "good," "strongly agree" or "somewhat agree," "very well" or "well," etc.) are presented in the body of the report. A complete set of frequencies for each survey question is presented in Appendix A: Complete Set of Survey Frequencies.

Also included are results by respondent characteristics and School District (*Appendix C: Comparisons of Select Questions by Respondent Characteristics* and *Appendix D: Comparisons of Select Questions by School District*). Chi-square or ANOVA tests of significance were applied to these breakdowns of selected survey questions. A "p-value" of 0.05 or less indicates that there is less than a 5% probability that differences observed between groups are due to chance; or in other words, a greater than 95% probability that the differences observed in the selected categories of the sample represent "real" differences among those populations.

The data for the opt-in survey are presented separately in the report titled Supplemental Online Survey Results.

APPENDIX H: SURVEY MATERIALS

The 2018 survey materials appears on the following pages.

Dear Westminster Resident,

It won't take much of your time to make a big difference!

Your household has been randomly selected to participate in a survey about your community. Your survey will arrive in a few days.

Thank you for helping create a better city!

Sincerely,

Estimado Residente de Westminster,

¡No le tomará mucho tiempo para marcar una gran diferencia!

Su hogar ha sido elegido al azar para participar en una encuesta sobre su comunidad. Su encuesta le llegará dentro de pocos días.

¡Gracias por ayudar a crear una ciudad mejor!

Kathryn Skulley Councillor Dear Westminster Resident:

Please help us shape the future of Westminster! You have been selected at random to participate in the 2018 Westminster Resident Survey.

Please take a few minutes to fill out the enclosed survey. Your participation in this survey is very important – especially since your household is one of only a small number of households being surveyed. Your feedback will help Westminster make decisions that affect our city.

A few things to remember:

- Your responses are completely anonymous.
- In order to hear from a diverse group of residents, the adult 18 years or older in your household who most recently had a birthday should complete this survey.
- You may return the survey by mail in the enclosed postage-paid envelope, or you can complete the survey online at:

www.bit.ly/westminsterresident2018

If you have any questions about the survey please call 303-658-2166.

Thank you for your time and participation!

Sincerely,

1 Mater

Herb Atchison Mayor, on behalf of the City Council

Estimado Residente de Westminster:

¡Por favor ayúdenos a moldear el futuro de Westminster! Usted ha sido seleccionado al azar para participar en la Encuesta de Residentes de Westminster del 2018.

Por favor tome unos minutos para completar la encuesta adjunta; si usted preferiría completar la encuesta en español, por favor siga las instrucciones abajo para acceder a la encuesta por medio de la red. Su participación es muy importante – especialmente porque su hogar es uno de solamente un número pequeño de hogares que se están encuestando. Sus observaciones le ayudarán a Westminster tomar decisiones que afectarán a nuestra ciudad.

Algunas cosas para recordar:

- Sus respuestas son completamente anónimas.
- Para poder escuchar a un grupo diverso de residentes, el adulto de 18 años o más en su hogar que haya celebrado su cumpleaños más recientemente debe completar esta encuesta.
- Puede devolver la encuesta por correo en el sobre pre-pagado adjunto, o puede completar la encuesta en línea en español en:

www.bit.ly/westminsterresident2018

Para la versión en español haga clic en "Haga clic aquí para español" en la parte superior de página.

Si tiene alguna pregunta sobre la encuesta por favor llame al 303-658-2137.

¡Gracias por su tiempo y participación!

Atentamente,

6. Alter

4800 West 92nd Avenue Westminster, CO 80031

Please have the adult household member (18 years or older) who most recently had a birthday complete this survey. Year of birth of the adult does not matter. Thank you.

1. Please rate each of the following aspects of Westminster.

	Very <u>good</u>	Good	Neither good <u>nor bad</u>	Bad	Very <u>bad</u>	Don't <u>know</u>
Westminster as a place to live	1	2	3	4	5	6
The overall quality of your neighborhood	1	2	3	4	5	6
Westminster as a place to raise children	1	2	3	4	5	6
Quality of local public schools in Westminster	1	2	3	4	5	6
Westminster as a place to retire	1	2	3	4	5	6
Westminster as a place to work	1	2	3	4	5	6
Job opportunities in Westminster	1	2	3	4	5	6
Openness and acceptance of the community toward peop of diverse backgrounds		2	3	4	5	6
Openness and acceptance of City programs and services toward people of diverse backgrounds		2	3	4	5	6
Overall image or reputation of Westminster	1	2	3	4	5	6
The overall quality of life in Westminster	1	2	3	4	5	6

2. To what extent do you agree or disagree that each of the following statements describes your image of the City of Westminster?

	Strongly agree	Somewhat <u>agree</u>	Somewhat disagree	Strongly disagree
Financially sustainable	1	2	3	4
Vibrant, inclusive and engaged community	1	2	3	4
Beautiful parks/open spaces	1	2	3	4
Visionary and progressive	1	2	3	4
Dynamic, diverse economy	1	2	3	4
Safe and secure	1	2	3	4
Environmentally sensitive	1	2	3	4
Ease of mobility	1	2	3	4

3. Please rate how safe or unsafe you feel from the following:

	Very <u>safe</u>	Somewhat <u>safe</u>	Neither safe nor unsafe	Somewhat <u>unsafe</u>	Very <u>unsafe</u>
Violent crimes (e.g., rape, robbery, assault)	1	2	3	4	5
Property crimes (e.g., burglary, theft, vandalism, auto theft)	1	2	3	4	5
Residential fires	1	2	3	4	5

4. For each of the following services provided by the City of Westminster, first please rate the quality of the service and then how important each of these services is in Westminster.

	Very <u>good</u>	<u>Good</u>	Neither good nor bad	Bad	Very <u>Bad</u>	Don't <u>know</u>		Very important	Somewhat important	Not at all important	Don't <u>know</u>
Sewer services	1	2	3	4	5	6	1	2	3	4	5
Recycling drop off centers at		-	_		_				_		_
City facilities		2	3	4	5	6	1	2	3	4	5
Police traffic enforcement		2	3	4	5	6	1	2	3	4	5
Police protection		2	3	4	5	6	1	2	3	4	5

Preservation of natural areas											
(open space, greenbelts) .	1	2	3	4	5	6	1	2	3	4	5
Building permits/inspections	1	2	3	4	5	6	1	2	3	4	5
Utility billing/meter reading	1	2	3	4	5	6	1	2	3	4	5
Snow removal		2	3	4	5	6	1	2	3	4	5
Street repair	1	2	3	4	5	6	1	2	3	4	5
Street cleaning		2	3	4	5	6	1	2	3	4	5
Overall customer service by Westminster employees (po	lice,					-					
receptionists, planners, etc	c.).1	2	3	4	5	6	1	2	3	4	5
Overall quality of services provided by the City	1	2	3	4	5	6					

5. Overall, would you say the City is headed in the right direction or the wrong direction?

O Right directionO Wrong directionO Don't know

6. Please rate the following statements by circling the number that most clearly represents your opinion:

Strongly agree	Somewhat agree	Neither agree nor disagree	Somewhat disagree	Strongly <u>disagree</u>	Don't <u>know</u>
I receive good value for the City of Westminster taxes I pay1	2	3	4	5	6
The Westminster government welcomes citizen involvement1	2	3	4	5	6
City Council cares what people like me think1	2	3	4	5	6

7. How familiar, if at all, are you with each of the following emergency communications in Westminster?

	Very familiar	Somewhat familiar	Not at all familiar
Code Red (reverse 911)	1	2	3
EAS (Emergency Alerting System)	1	2	3

8. Does your household currently have each of the following?

	Yes	No	Don't know
A family shelter-in-place plan	1	2	3
A family evacuation plan	1	2	3
An emergency preparedness kit	1	2	3
