

How do I create an account in the Westy Water customer portal?

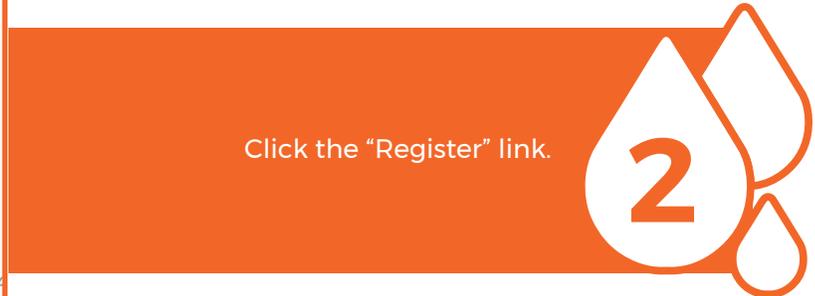

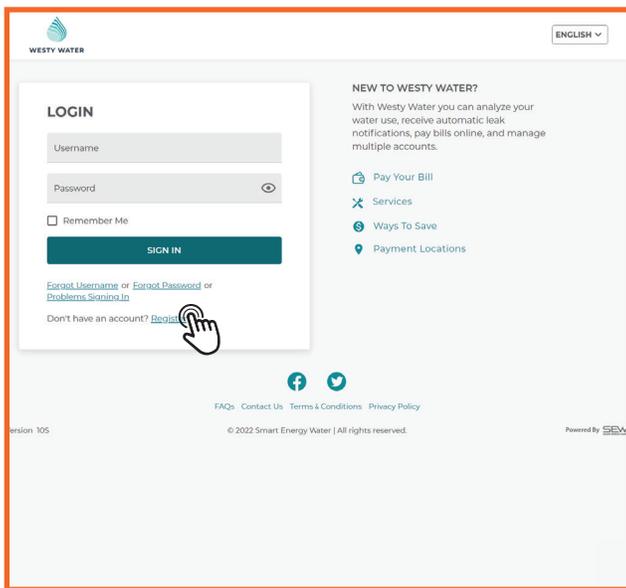

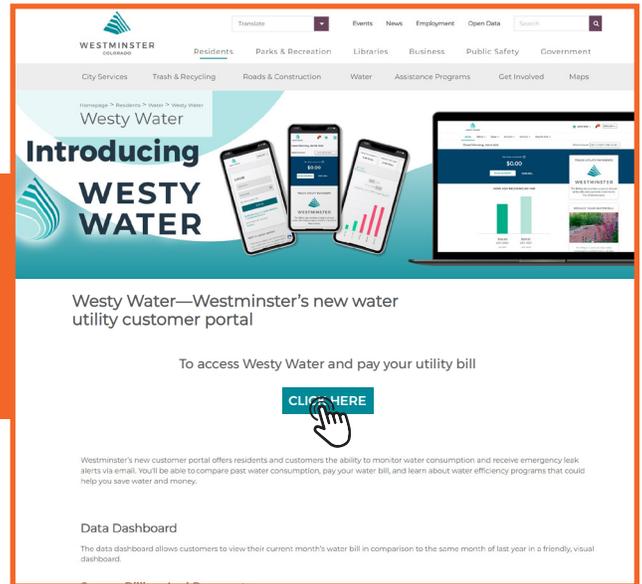

This guide will help you create an account for the Westy Water portal. Westy Water allows customers to view their water use, receive emergency leak notifications, pay bills, view conservation programs, and much more.

Prerequisites:

- A valid email address.
- A valid phone number.
- Your eight-digit utility account number and eight-digit customer number as shown on your bill.

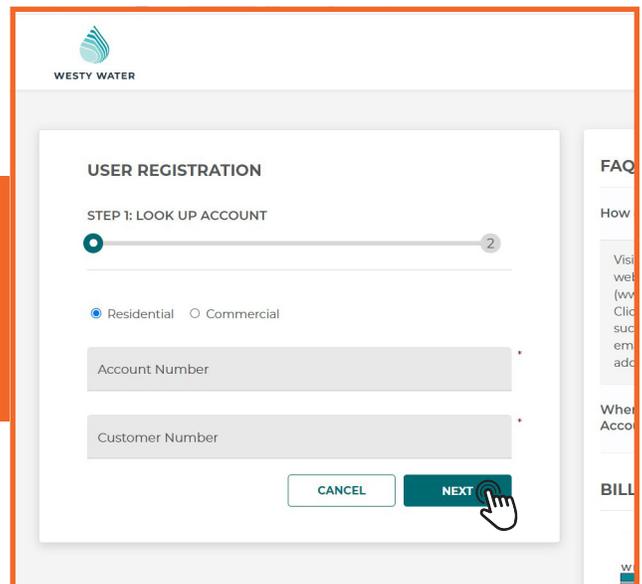

Open your web browser to the main Westy Water page at www.CityofWestminster.us/WestyWater and click the “Click Here” button.

Click the “Register” link.

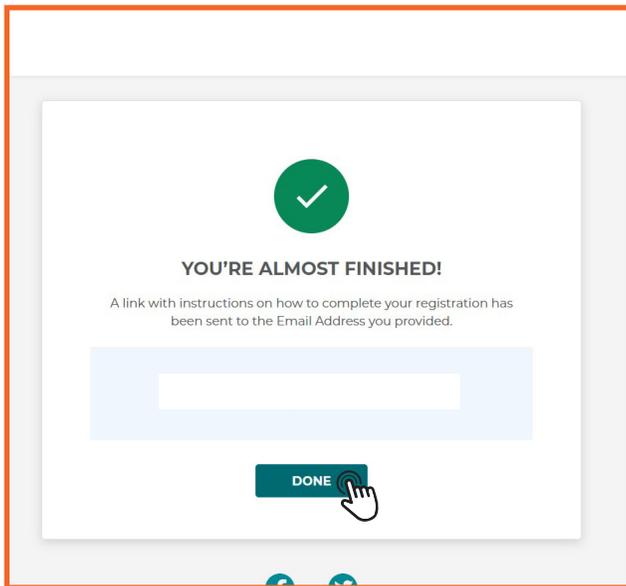

Select either “Residential” or “Commercial” and then enter your existing 8-digit utility account number and customer number. Click “Next.”

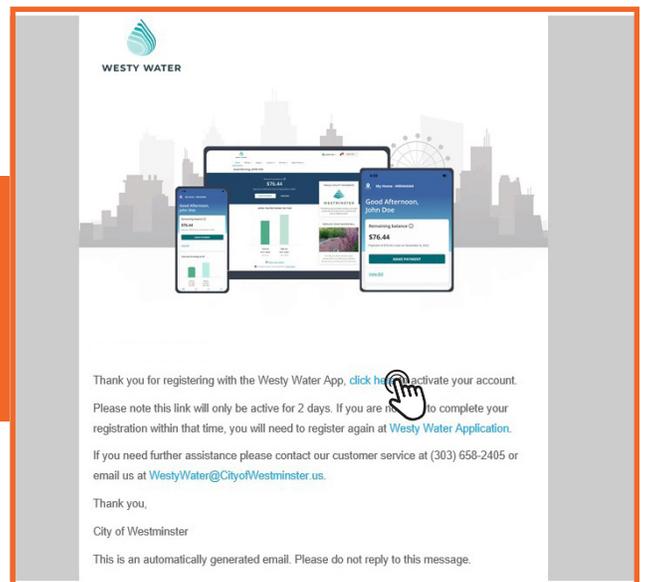

Fill out the required information, check your preferred options in the boxes, and then click "Register."
**Westminster strongly recommends subscribing to Leak & Bill Notifications.*

You will now see a success message saying "You are almost finished." Click "Done" and open your email.

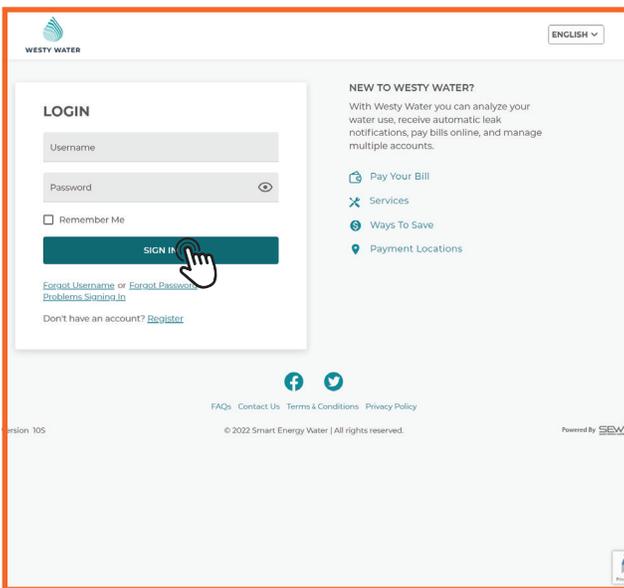

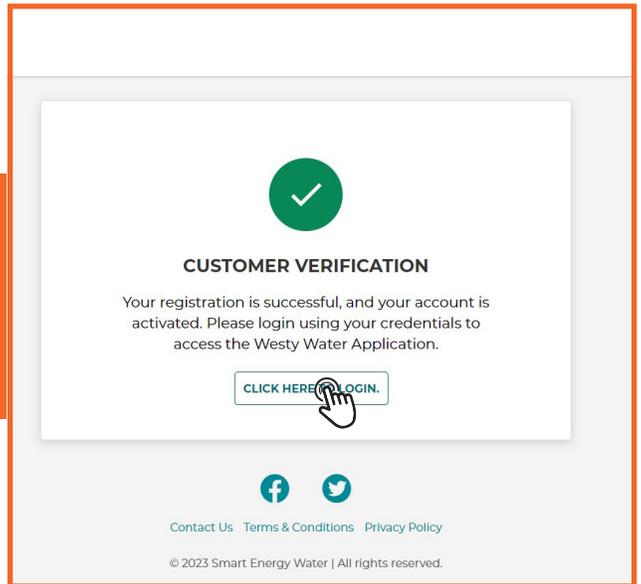

Click the "Click Here" link in your email message to access your account.

Your email will open a new web page to your customer verification. Click the button “Click Here to Log In.”

Enter your new Westy Water login credentials and click “Sign In.”

You now have access to your new Westy Water account. View water use, set up auto payments, and explore the new portal.
